

Engineering Skills for Industry

Do you fancy a career in Engineering?

Are you 18 or over?

Are you unemployed?

This is a 26 week programme (36 hours per week) providing engineering skills/personal development competencies to match the engineering employers' recruitment entry level.

The programme offers practical workshop skills training, underpinning knowledge and industrial placement and NVQ in Engineering

The Programme aims to

- Provide participants with the skill competencies identified by industry as a necessary requirement for employment.
- Provide local companies with a pool of recruits with the right skills and knowledge to develop within the company

You must be eligible for New Deal to apply for this course
